FAIZAN AHMED KHAN

AI / MACHINE LEARNING ENGINEER | GENERATIVE AI, RAG, AGENTIC SYSTEMS & ARABIC NLP

khanfaizan1532001@gmail.com | LinkedIn | GitHub | Open to global AI engineering opportunities

PROFESSIONAL PROFILE

AI / Machine Learning Engineer with **3+ years of combined industry and research experience**. Focused on production language AI, enterprise RAG, Arabic-English NLP, offline model inference, evaluation and reliable serving. Built and documented multilingual applications, hybrid search pipelines, recommendation systems and reproducible model-deployment workflows.

PROFESSIONAL EXPERIENCE

GLOBAL TECH TECHNOLOGY | MACHINE LEARNING ENGINEER

Doha, Qatar | Sep 2025 - Oct 2026

- Fine-tuned NLLB-200 for English-Arabic domain translation; internal evaluation reported BLEU improvement from 57 to 85.
- Applied INT8 quantization to reduce model footprint from 2.4 GB to 600 MB, with reported 3× faster CPU inference.
- Built offline document/visual translation services and private RAG over 100,000+ document and email chunks, combining BM25, dense retrieval, neural reranking, ChromaDB and Ollama.
- Developed Arabic-English speech workflows with faster-whisper, diarization, WebSocket STT, voice activity detection and TTS readback.

NATIONAL INSTITUTE OF TECHNOLOGY JALANDHAR | MACHINE LEARNING RESEARCHER

Jalandhar, India | Sep 2024 - Jul 2025

- Researched network anomaly detection on CICIDS2017 with PCA, KNN, Random Forest and SVM; reported model accuracies of 99.46%, 96.68% and 88.18%, respectively.
- Explored temporal learning with LSTM and traffic clustering with K-Means.

GOALWIT TECHNOLOGIES PVT. LTD. | MACHINE LEARNING ENGINEER

New Delhi, India | Jul 2022 - Aug 2023

- Developed a hybrid recommendation engine with A/B testing; reported 35% improvement in match precision.
- Built a Rasa NLU assistant supporting 50,000+ monthly conversations; deployed with AWS Lambda and reduced response latency in reported testing.

SELECTED OPEN SOURCE & INDEPENDENT PROJECTS

SADA Voice AI: Bilingual Arabic-English voice support prototype with FastAPI, WebSockets, browser audio, optional Whisper/Ollama and interruption-aware playback. Public synthetic-data demo: sada-voice-ai.onrender.com

Muhawir: LangGraph-driven bilingual agentic RAG with hybrid retrieval, reranking, MCP tools, guardrails and RAGAS/MLflow regression workflows.

Lahja: Config-driven Gulf Arabic LLM adaptation pipeline with QLoRA, evaluation, INT4/GGUF quantization and streaming FastAPI inference.

InterviewLens AI: Recorded-interview analysis prototype linking evidence-based feedback to targeted learning and practice.

TECHNICAL SKILLS

AI / ML: Python, PyTorch, TensorFlow, Scikit-learn, Hugging Face, PEFT/QLoRA, Transformers, NLLB-200, Whisper, OCR.

GenAI & Retrieval: LangGraph, LangChain, LlamaIndex, RAG, BM25, Qdrant, ChromaDB, FAISS, Redis, neural reranking.

Serving & MLOps: FastAPI, Docker, Kubernetes, MLflow, GitLab CI/CD, Prometheus, Grafana, Ollama, ONNX Runtime, AWS, Azure, GCP.

EDUCATION

M.Tech, Artificial Intelligence | National Institute of Technology Jalandhar | 2023-2025

B.Tech, Computer Science & Engineering | Jamia Hamdard, New Delhi | 2018-2022
